STELLA M. JOHNSON

GENERAL STATEMENT

THE courses offered in extension are, for the most part, intended primarily for those engaged in teaching. However, all other qualified persons will be admitted to these classes. All courses will be taught by members of the College Faculty, and will be of college grade. The credits earned by High or Normal School graduates in these courses will be counted by Lebanon Valley College towards its Baccalaureate degrees. A certificate will be issued to persons who are not graduates of a standard High School or its equivalent, provided the work is satisfactorily completed.

EXPENSES

A fee of \$1.00 will be charged for matriculation and registration. The tuition charge for extension courses will be \$7.00 for each point, a point being a semester hour. For example, the charge for matriculation and registration in courses leading to eight points credit would be \$57.00. This is approximately the regular fee for tuition in the college. Fees for the first term are due and payable on or before October 12 and for the second term on or before February 8. Remittances should be made to Lebanon Valley College, and may be sent by mail to Agent of Finance Committee.

DESCRIPTION OF COURSES

ECONOMICS

E-72. Modern Economic Problems. Two hours. Throughout the year.

A survey of current matters of economic interest and the Economic Principles applicable thereto: Monetary Standards; Foreign Debts; Business Cycles; Public Finance; Governmental Regulation of Business, etc.

ENGLISH

E-524. American Literature. Two hours. First semester.

Chief American Poets from Philip Freneau to Robert Frost. The best of American Poetry considered in the light of historical, and social developments. Text: Prescott and Sanders: An Introduction to American Poetry. 1932.

Second Semester; American Prose Masters. Two hours.

E-24. Survey of English Literature (English 26). Two hours. Throughout the year. This course is required of all College Sophomores.

GERMAN

E-14. This Course is a continuation of the course given in Harrisburg last year. Prerequisite; four hours credit in German.

HISTORY

E-134. English Biography. Two hours. Throughout the year.

A study of English History from the biographical approach.

PHILOSOPHY

E-24. History of Philosophy. Two hours. Throughout the year.

In this course the aim will be (1) to trace the development of Philosophy, pointing out what of permanent value each system as it arose, contributed toward a final solution of the nature of being, and (2) to show the interaction between philosophical thought and the practical life of the period during which it flourished.

SPECIAL WORK AT THE COLLEGE

(Begins September 24; 8:00 A. M.)

BIOLOGY

Biological Methods for Teachers.

Requests have been made so frequently for information concerning procedures for which the beginning teacher has no preparation in the usual courses that the "Methods" course as here outlined has been prepared, with the belief that it will be found helpful to many young teachers.

The course includes methods of procuring and preparing materials for use in the class room to supplement the text and laboratory manual with visual matter to vitalize the course and create a love for nature study and the out-of-doors. Mounting specimens for display, bird and mammal skins and skeleton and dissections, the care of organisms in vivaria, nature photography and lantern slide making, preparing microscopic slides, sources of laboratory equipment, reference books, making of charts and models, developing nature trails, individual projects in behaviour of organisms, etc., are included. The course will require about five or six hours a day. Six semester hours' credit.

CHEMISTRY

(Course to be arranged)

EDUCATION

Educational and Mental Tests. Two hours. Throughout the year.

This course aims to acquaint the student with the standardized achievement and mental tests. The work of the first semester will be given to a study of available educational tests and scales; technique of administering and scoring tests; methods of tabulating and interpreting results; use of results in diagnosis, classification and guidance. The second semester will deal with mental tests. History of mental tests; types of mental tests; use and results of tests in school. Methods of conducting tests are discussed and demonstrated. Text books, assigned readings, and test materials. Laboratory fee of one dollar each semester. Four semester hours' credit.

GERMAN

Readings from contemporary German Literature, stories, plays, essays, conversation, grammar, composition.

Prerequisite; six or eight hours' credit in German.

MATHEMATICS

E-14. Advanced Algebra. Two hours. Throughout the year.

Covering ratio and proportion, variation, progressions, the binomial theorem, theory of undetermined coefficients, logarithms, permutations and combinations, theory of equations, partial fractions, etc.
